Information on Regulation (EC) No 1907/2006 of the European Parliament and the Council dated 18th of December 2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH).

REACH registration of products made by svt Brandschutz GmbH

Within the framework of environmental protection the REACH regulation (REACH = Registration, Evaluation, and Authorization of Chemicals) plays an important role for the chemical industry. This regulation governs from the 1st of June 2007 the Registration, Evaluation, Authorization and Restriction of Chemicals.

The registration respectively pre-registration of substances is carried out by the manufacturer or importer.

Given that our products are only preparations of raw materials in accordance with clearly defined recipes, therefore no own registrations are required for svt Brandschutz GmbH.

In close cooperation with our suppliers we receive only pre-registered materials.

That means the products of svt Brandschutz GmbH are completely available in their present form.

REACH – Representative: Andree Schober

Position: Zentrale Technik / Head of chemistry division
