# Company Profile

## svt Group of Companies

---

### At work around the world

Our diversified product range, which has an international track record of proven performance encompassing over 50 years, is sold through our 15 foreign subsidiaries and a network of partners in more than 50 countries.

Our product portfolio includes:

- Firestop barriers for cables, for combustible and non-combustible pipes as well as for ducts and conduits
- Intumescent and ablative coatings for cables and structural steel
- Fire protection wraps, collars, pillow seals, joint sealings, sealants and other materials
- Fire protection compounds, penetration sealing systems, granulates, mineral fibre boards, glazing blocks and strips
- Fire safety glass

By the way: svt Group not only boasts an exceptionally broad array of products and systems, but also offers a comprehensive service of knowledgeable advice and guidance on how to use them for optimum benefit. Questions revolving around the topic of fire protection in general are also welcome.

### Why to choose svt?

svt is the go-to **full-service provider** in the field of passive structural fire protection and damage restoration.

svt offers the **most comprehensive portfolio of fire protection products** designed for structural engineering and industrial construction, infrastructure as well as industrial applications.

svt means quality like „**Made in Germany**“, because our quality promise knows no borders and also applies to all international locations. In-house research & development, numerous own testing furnaces and several production sites contribute significantly to this.

svt is your partner of choice when it comes to delivering **certified standard solutions** and devising **customised solutions that meet the most stringent of fire protection requirements**.

Choosing svt means choosing more than **50 years of experience**.
