Staying Safe Along the Way With Advanced Fire Protection Solutions

Smart mobility is gaining momentum and poses ever new challenges in terms of safety, security and climate protection. The svt Transportation team is your seasoned expert in all aspects of this speedily advancing field and will help you keep safe along the way with ...

- the combined fire protection knowledge and expertise of a high-performing corporate group.
- tailor-made safety solutions for all areas of mobility.
- future-oriented fire protection concepts thanks to a wealth of experience also in the field of (re)new(able) energies and green mobility.
- forward-looking lightweight solutions – minimum weight, maximum safety.
- end-to-end efficiency thanks to consistent weight saving measures.
- in-house research and development activities including extensive fire tests and meticulous product testing.
- qualitatively verified results in accordance with national and international standards – for all branches of the transport industry.

In a nutshell: svt is a one-stop creator, manufacturer and supplier of top-notch preventive fire protection solutions that take transport safety to a new level!
